

DIAMOND THERAPY

Diamond Frizz Fix is an intensive smoothing and repair treatment designed to restore the health, shine, and manageability of the hair in a single session. Enriched with plant oils, proteins, amino acids, and marine extracts, it rebuilds the hair fibre from within while leaving a lightweight, protective finish.

KEY INGREDIENTS:

- **Natural Oils (Grapeseed, Argan, Black Seed, Castor, Amla)**
Deliver lightweight nourishment, enhance shine, improve elasticity, and protect against breakage.
- **Proteins & Amino Acids (Hydrolysed Rice & Soy, Glycine)**
Strengthen and rebuild the hair fibre, increasing resistance and resilience.
- **Marine & Botanical Extracts (Algae, Amla)**
Provide essential minerals and antioxidants for hydration and environmental protection.
- **Moisture & Frizz Control**
Glycerin, fatty alcohols, and advanced polymers lock in moisture, smooth the cuticle, and form a protective barrier against frizz and dryness.

Ideal for clients with dry, damaged, frizzy, or unruly hair, the treatment delivers noticeable results immediately after application. When used with a flat iron, it creates a polished, laminated effect that enhances smoothness and shine.

TREATMENT RESULTS

- Smooth, frizz-free hair
- Healthy shine and soft texture
- Improved manageability and volume
- Strengthened ends with reduced splitting
- Long-lasting results, up to several weeks

STEP-BY-STEP GUIDE

Step 1: Wash the Hair

Cleanse the hair thoroughly with shampoo twice to remove impurities and product build-up. Use a mild clarifying shampoo (Golden Professional Step 1 shampoo) to help open the cuticle.

Note: If performing the treatment immediately after colouring, do not use clarifying shampoo—opt for a gentle post-colour cleanser instead (use the Nano shampoo 1L).

Step 2: Towel Dry

Towel-dry the hair until it is approximately 60–70% dry. Hair should remain damp, but not wet.

Step 3: Section the Hair

Divide the hair into manageable sections to ensure even application.

Step 4: Apply the Product

Apply Diamond Frizz Fix evenly to each section. Use a tint brush or hands, avoiding the scalp by maintaining a gap of approximately 1 cm from the roots.

Step 5: Massage and Process

Massage the product gently into the hair to aid penetration. For enhanced absorption, you may cover the hair with a cap, or use a hair steamer, Photon laser or ultrasonic & infrared tool if available.

Step 6: Leave-In Time

Allow the product to process for 30 to 45 minutes. Processing time depends on the level of damage—more damaged hair may require a longer time.

Step 7: Rinse

Rinse the hair thoroughly with lukewarm water until the product is fully removed.

Step 8: Blow Dry

Blow-dry the hair using a ceramic or round brush to smooth the cuticle and prepare for styling.

Step 9: Flat Iron (Optional)

For a high-gloss, laminated finish, use a flat iron at 180–200°C. Straighten each section 5 to 8 times for best results. This step is optional but recommended for clients seeking a straighter or sleeker result.

AFTERCARE RECOMMENDATIONS

- Do not wash the hair for at least 48 hours after the treatment.
- Use sulphate-free, hydrating aftercare shampoos and masks—ideally from the Frizz Fix or Diana Premium range—to maintain longevity and shine.
- Avoid swimming in chlorinated or saltwater and protect the hair from excessive sun exposure.
- Colouring services can be performed on the same day.
- Avoid brushing curls or waves aggressively. Use a wide-tooth comb or fingers to detangle.

IMPORTANT NOTES

- Avoid use on irritated or broken scalp.
- Store the product in a cool, dry place and follow all professional safety guidelines during application.
