

Lami Mask - a highly nourishing and paraben-free mask, designed for aftercare treatment. Suitable after any type of smoothing or straightening treatment. The product moisturizes the hair and protects it from tangling. It provides a smoothing effect and retains moisture for a long time. It gives the hair a glossy look and shine.

Fixing Spray - a glossing spray that fixes the hair lamination treatment. Gives the hair softness and elasticity. It also protects the hair from high temperatures.

INSTAGLAM - A REVOLUTIONARY INSTANT HAIR TREATMENT

Formula is rich in vegan keratin and plant oils to provide a boost of antioxidants and vitamin E to the hair. Lamination reduces the frizz, seals and fills the gaps in the most damaged areas transforming the hair into glossy, soft, smooth and easy to manage.

Lamination can be done as a rebuilding & anti-frizz treatment, or after colouring service.

THE PROFESSIONAL 3-STEPS INSTAGLAM KIT INCLUDES:

Step 1
Priming Shampoo
500 ml

Step 2
Laminating Fluid
500 ml

Step 3
Fixing Spray
250 ml

HOW TO USE

1.

Wash the hair twice with Step 1 Priming Shampoo. It is a specially designed product with neutral pH to gently cleanse and remove any build-up.

2.

Once the hair is washed, use a towel to remove the excess water from the hair.

3.

Section the hair and apply the Step 2 Laminating Fluid on each strand. To achieve the best results, use a wide teeth comb to ensure that the product is applied evenly.

You should always wear gloves when applying the product. Avoid product application directly on the scalp.

To boost the effect of the treatment use a hair cap and leave the product on for 15-20 minutes.

4.

Rinse the product with water only. Next, wash the hair thoroughly with Step 1 Priming Shampoo. Towel dry the hair and spray it with the Step 3 Fixing Spray. Comb the hair thoroughly and leave the product on for 5 - 10 minutes.

5.

Blow dry the hair using a hairdryer & round brush. For best results, set your straightener to 210C degrees and pass it 3 times on each section.

IMPORTANT

Lamination treatment can be repeated every 4 weeks.

Lamination works only on the outer layer of the hair so it is not a deeply regenerating treatment. If you are looking for a deep regenerating and smoothing treatment, please check out our Diana Hair Botox line!

AFTERCARE

The effect of InstaGlam treatment lasts up to 4 weeks.

The long-lasting results strongly depend on the homecare products that your clients use after the treatment. Remember to recommend using the shampoo, mask, and spray dedicated to InstaGlam product line.

Lami Shampoo - aftercare shampoo is developed with specially selected nutritional extracts that help preserve the effect of the treatment for a long time. It ensures the softness and beautiful appearance of the hair. The shampoo is suitable after any type of smoothing or straightening treatment.
